How to Crack a Basic Trial Application / Software in 5 mins with OllyDbg (EyeTwig . some European autocasting experts believe, the question will be the marketability of a theory that is full of corner cases. But some examples of interesting contributions to construction theory are already in existence. For example, one outstanding problem with technology-driven autocasting is that the assumed beneficial effect on construction productivity is highly debatable, and the lack of any proof of causation between autocasting and productivity is so far unpublished. This is because—to date—no software has been developed to back up the claim that autocasting is able to manage higher productivity. The pendulum of construction theory may have swung too far in that direction. Another challenge for construction autocasting is that building automation is not a simple subject. Autocasting must not only address the question of how automation fits into overall design, but also which tools and methods are appropriate. The suitability of autocasting also depends on the type of building. Contractors and clients often have different interests. The contractor might

Avantha ProSim Plus includes: Pressure Analyser control for ESA612(R). Free demo version is available for download upon password request. Bo Consulting BVS has been a supplier of process simulation software for 20 years. Q: Upper Limit(as a percentage) with rank i I have a table that looks like this:

date	Name	Rank
1	Test	1
2	Test2	2
3	Test3	3
4	Test4	4
5	Test5	5

I need to calculate a upper limit (as percentage) on the rank column based on the date column. The end result should look like this:

date	Name	Rank
1	Test	1
2	Test2	2
3	Test3	2
4	Test4	3
5	Test5	3

A: You can use ROW_NUMBER() function
